

How to make a pinhole camera

You will need:

- paper
- aluminium foil
- scissors
- sticky tape
- a skewer.

1

Fold paper in half

2

Cut into the fold

3

Cut along in a square shape

4

Unfold for a square hole

5

Stick foil over the square

6

Poke a circle through the foil

7

With your back to the sun, hold the foil in the light to project an image of the eclipse.

Warning: never look directly at the sun, even during an eclipse.
